## Mite control with laundry finisher!

You can add a mite-repellent finish when you do laundry. This conditioner gives anti-mite effect to the materials, so mites are blocked from transferring to sheets and bed clothes from beds and mattresses. You can use it with softeners, bleaches, or starch. It lasts for about 2-3 laundry cycles (based on in-house test.)

Anti-bacterial too!

Reduce from the root

Boric Acid Trap

Uses onions for the main ingredient of its smell

Extra thin type 7mm

Includes double-sided tape for use on walls

Individually wrapped to keep the freshness

## Just place!! Exterminate cockroaches

The product attracts cockroaches with the smell of onions that they like, then keeps them away with the active ingredient (boric acid). It repels cockroaches from indoors, and prevents them from reproducing.

Power of nature, Natural ingredients

Repel with the aroma they dislike

Contains "Copaiba Oil"  
Repelling aroma is the main ingredient so keep them away and see no more!

## What is Copaiba Oil?

Copaiba, also known as *Copaifera officinalis*, is a leguminous plant originating in Brazil and Venezuela. It has a large trunk and a smooth bark, has a lot of branches, and some can grow up to 30m tall. Specialists drill a hole in the trunk to extract non-volatile or hardly volatile resin, then the extract is distilled to make copaiba oil.
