Me-friendly, family-friendly, eco-friendly

We deliver helpful “comfort” for everyday life.

In our lives, many things are overloaded and developed, and our lives are getting richer and richer. But do they truly make days more comfortable? Creating products that genuinely help making the future “comfortable”... UYEKI delivers “comfort” and “friendliness” with an insistent focus on the ingredients for “people” and “nature.”

To bring users’ “I want” requests into shape

The starting point of UYEKI to look into future life styles

We want to offer helpful products by rapidly acknowledging customers’ “if only there were something like...” We are working on developing products with the four features that make everyday life more comfortable, hoping to bring customers’ “if only” to reality.

Orange Oil Products

“Orange oil” is the starting line of UYEKI. After it was spotlighted for cleaning graffiti on the walls of New York subway, we began developing daily household sundries that utilizes the power to permeate through oil-based stains such as permanent markers. Then the know-how has spread to “Drying,” the precedent for laundry detergent for dry-cleaning garments, and household cleaners. And it obviously has no effect to the human body. Orange oil is also an eco-friendly ingredient, for it is extracted from the peels that were produced in the processing of juice and cans, then the processed peels are recycled as cattle manure. We deliver our products from the standpoint of protecting people and the environment.

Protective Products

You can’t get away with everyday cleaning. But how nice would it be, if we could make it done with less effort? We put ourselves in the home makers’ shoes to come up with “stain-protective” effects. The more you clean with it, the stronger it gets against stains and blemishes, so daily cleaning becomes easier and easier. Cutting down on the effort of everyday housework, we produce a more comfortable living space. Floors and drains are what we use daily, so we want to keep those areas clean at all times... We propose “living aesthetic techniques” for our fast-paced era.

Repellent Products

Daily cleaning and washing is crucial in preventing pests that may cause negative effects in life. But pesticides and insecticides couldn’t be good for the body. So we focused on the idea to “repel.” We succeeded in developing products that used the behavior of pests effectively to keep them away and lessen them. We use safe ingredients to deliver a more comfortable and a worry-free living space.

Fragrance Products

“Fragrance” is gaining more attention in our stressful society with its relaxation effects. UYEKI adopted the highest grade aroma. We developed daily commodity with authentic fragrance that you can enjoy. The highly effective features stay the same. Fragrance colors your life luxuriously from your garments and your rooms with pleasure. To spend stressful days more richly, more comfortably, and more luxuriously. We propose something we can’t cut off from our ages to come.
